

Maximatic

For a maximum espresso taste.

The Maximatic is the perfect semi-automatic espresso machine for those who are looking for a little more luxury.

- Dual-circuit espresso machine
- Most compact machine of its class worldwide

Born in 1974. The Maximatic is the perfect partner for all those who are looking for a little more luxury. The electric, semi-automatic espresso machine with vibration isolated pump is so handy and small that it almost fits on an A4-sized piece of paper. This has been made possible thanks to the individual production of all components, ranging from the vibration isolated pump to the boiler and thus making the Maximatic the smallest espresso machine with a dual circuit heating system in the world. It is so straightforward and easy to handle that it can be used at home as well as in offices, studios, doctors' surgeries and galleries.
